## Modular Pineapple Mill

- Side milling of high quality surfaces.
- For geometries which aren't accessible for face milling.

# SUPERIOR SURFACE FINISH CAPABILITY

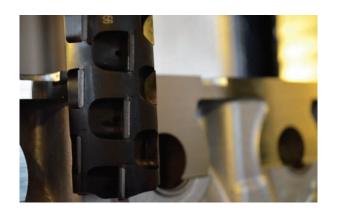

- > Based on successful pineapple system for lateral and face milling, this new development allows the combination of the previous solution with excellent finish on lateral perpendicular faces.
- > Flat and non-flat surfaces can be machined with the same high quality.
- > The modular system allows for full interchangeability between tool systems.

### Modular Pineapple Mill

### Superior Surface Finish Capability

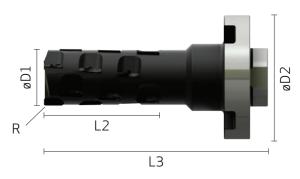

| CUTTING PARAMETERS |            |         |         |  |  |  |  |
|--------------------|------------|---------|---------|--|--|--|--|
| S (rpms)           | F (mm/min) | Ap (mm) | Fz (mm) |  |  |  |  |
| 5000               | 600 mm/min | 0,5     | 0,04    |  |  |  |  |

### **PRODUCT DETAILS**

- PCD tipped.
- Excellent for finishing in side milling applications.
- Soft cutting through axial rake development.
- Excellent tool life.
- Fine balanced for High Speed Cutting.
- With internal cooling.
- Modular adapter with 4x4.

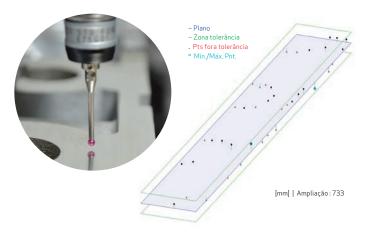

### **APPLICATIONS**

- Can be used both for mild roughing and finishing.
- Common system for gear box and cylinder head production.
- Perfect for Aluminum, AL-Alloys and Magnesium.
- With finishing parameters Ra-0,4 µm (and below) achievable.

With this system it is possible to achieve a surface roughness between:

 $Ra \rightarrow 0.4$  to  $0.2 \, \mu m$ 

Flatness of 0.013mm

(measured on 200mm length)

| Art. n°   | øD1 | øD2 | L1  | L2 | R   | Z |
|-----------|-----|-----|-----|----|-----|---|
| 9594.0300 | 30  | 70  | 110 | 50 | 0,4 | 3 |
| 9594.0400 | 40  | 80  | 130 | 60 | 0,4 | 4 |
| 9594.0500 | 50  | 100 | 150 | 70 | 0,4 | 5 |

Requires cutting edge run-out adjustment in the machine spindle.
